

"Scouts" Have Arrived Boys Going "Wild" Over Them!

They're here, boys! Those world-famous "Boy Scout" Shoes—the shoes you have been reading about in the big magazines—the shoes that have made such a tremendous hit in the big cities—are now in town and ready for you. And they're "beauts"! Better than the magazines said they were, if such a thing is possible. Nothing like them for baseball, running, jumping or any outdoor sport. Colors: Olive, Tan and Black.

The "BOY SCOUT" Shoe

is made especially for the growing foot. It's the most sensible—the most attractive—the most comfortable shoe ever made for rough and tumble wear.

The tops are as soft as a glove—they're made from Elk Skin Leather. Soles are made from high grade Elk Sole Leather and heels are solid Elk Leather. Our secret tanning process makes the soles wear two to three times as long as

common soles. And they're put on so good they can't pull off.

"Boy Scouts" are made without linings—they're the coolest and most healthful shoes on the market.

Tell your pa and your ma about them. Tell your pa he can get a pair for himself, too. Tell him they'll outwear two to three pairs of ordinary shoes. Have him bring you up to look at them—costs nothing to see them.

\$30,000 OLAA BONDS SOLD

One lonely session sale was made this morning on the Stock Exchange, five shares of Onomea selling for \$53.25, a drop of a quarter of a point over the last noted selling price.

Between boards, Ewa at \$33, a drop of half a point, was taken in several good-sized blocks, and a large amount of Olaa bonds went at \$97.50, the biggest sale being \$30,000. There were some other scattering sales. The day was dull and selling very slow and listless.

NURSING BOTTLES PREHISTORIC.

According to recent discoveries it appears that nursing bottles were used even in prehistoric times. This is true at least for the age of polished stone, inasmuch as a French archeologist, M. Neubise, when exploring a neolithic funerary deposit, found a small clay nursing bottle, and this was quite intact. This is not the only specimen of the kind which comes from the early ages.

ARMY WIRELESS PLANT IS TINY

No Late News On Navy Plant
Announced January 20 in
Local Press.

While one, and possibly two, great transoceanic commercial wireless systems are being planned for Oahu, and a naval plant which is to be one link of an aerial chain around the globe is in prospect, the army in a very small way is getting into the game, and work has started on a wireless plant for Schofield Barracks. For some time the signal detachment of the big post has been looking for a small appropriation that would permit the construction of masts and aerials, and now the necessary authority has arrived and the nominal sum of \$200 is available for the work. However, all that is desired is a plant strong enough to communicate with the wireless at De Russy, and to pick up and talk with the transports close to port, and as the instruments are already on hand, the money can all be put into masts of sufficient height to answer the purpose. The sending and receiving instruments of the field wireless are to be used, and within a short time Lieutenant will have a wireless outfit sufficient for its immediate needs.

No word has been received by the naval authorities here regarding the \$200,000 plant for Pearl Harbor, news of which was published in the Bulletin of January 20 last. The local naval plant is part of an appropriation of \$1,000,000 asked for by the navy department, to form a chain around the world, but so far as is known here the money has not been voted by Congress as yet.
